700 x 38

STRENGTHS

• 4 tire volumes adapted to the various Gravel practises • 2 specific designs adapted to these 4 sections to optimise performance/ridability/comfort • High-quality casing for a better deformation capacity on roads and paths • Resistance to punctures and tears

IN PRACTICE

The Override is the tire for occasional or intensive Gravel use. On damaged classic roads, paths or tracks, the Override is the ideal tire for versatile and improvised outings. The 700x35 version adopts an adapted semi-slick profile favouring performance and comfort. The 700x38 version has been shaped on its central part to bring grip and ridability. In tubetype design (with inner tube), you will be convinced by its incredible versatility. In its Road Tubeless Ready version, its bead-to-bead reinforcement coupled to a lower pressure will impress all amateurs of cross roads and long journeys.

ADVICE FROM A PRO:

Elena BRIS - HUTCHINSON AMBASSADOR

"Override is the best way to start riding on gravel. It is a super ally on tarmac and paths: it is reassuring, comfortable, and its performance is excellent. Sometimes I have to use my bike to travel for work purposes, and I do not need to change my tires: Override perfectly meets my needs"

GRAVEL

CONCEPTS

TUBETYPE

DESCRIPTION

- Tubetype tire.

USE

- Competition and training

TUBELESS READY

DESCRIPTION

- Tubeless tire that require Hutchinson Protect'Air Max latex sealant to be airtight.

BENEFITS

- Safety: No tube to pinch-flat or bursts.
- Performance: Improved yield thanks to a better tire deformation. Greater lightness.
- Confort: Without a tube, lower tire pressure can be used without fear of a pinch-flat
- Particularly effective on challenging terrains.

USE

- Racing and training

HARDSKIN

Hardskin®, Textile grid reinforcement from bead to bead on the sidewalls and under the tread.

This technology is highly efficient against cuts, tears, holes and big impacts.

The Hardskin® is the essential partner for all riders seeking to avoid troubles.

REINFORCED+

Economical textile reinforcement from bead to bead that protects the sidewalls and the tread.
